OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

Exhibit A

Brady Power Partners seeks to appropriate geothermal rights held by Gilroy Foods Inc. under Application No.s 29511 and 29512 (Certificate No.s 10559 and 10560) considered to be abandoned or forfeited rights for nonuse pursuant to NRS 534.090.

Brady Power Partners is informed that Gilroy Foods Inc. has never beneficially used more than approximately 600 gpm in its existence and for a period in excess of five years has not used the additional approximately 800 gpm certified in Certificates 10559 and/or 10560 and has therefore abandoned and forfeited same.

This water will be used for a proposed plant expansion (Brady Power Partners has been looking for ways to expand for several years). The Brady Power Project has been using all its permitted rights since 1992 to produce electricity and benefit the State of Nevada. Additional water is needed for the plant expansion.
